A **SAGE Publishing** Resource

talk data to me

dataplanet

The broadest and deepest interdisciplinary resource for credible statistical content

Data Planet is the largest single repository of harmonized and structured statistical data available to libraries. With this dynamic tool, users can scan and search the contents of billions of datasets, compare and contrast variables of interest, and create customized views in tables, maps, rankings, and charts.

These vast amounts of data are easy to find through a single point of access and easy to analyze with robust search, visualization and analysis tools.

Data Planet also offers a library of reference articles that addresses the basics of all things data to support users as they build a foundation of data literacy.

What subjects are covered?

Datasets cover a wide range of subjects, including:

- Agriculture and Food
- Criminal Justice and Law Enforcement
- Banking, Finance, and Insurance
- Education
- Energy Resources and Industries
- Government and Politics
- Health and Vital Statistics
- Housing and Construction
- Industry, Business, and Commerce
- International Relations and Trade
- Labor and Employment
- Military and Defense
- Natural Resources and Environment
- Population and Income
- Prices, Consumption and Cost of Living
- Transportation and Traffic

librarymktg@sagepub.com

Where does the data come from?

Datasets are sourced from a wide variety of authoritative public, private and commercial sources across national and international organizations. Sources include:

- Bureau of Justice Statistics
- China Data Institute
- Claritas
- Energy Information Administration
- European Centre for Disease Prevention and Control
- Federal Bureau of Investigation
- MIT Election Data and Science Lab
- National Cancer Institute
- National Center for Education Statistics
- Organisation for Economic Co-operation and Development
- Statistics Canada
- United Nations
- US Equal Employment Opportunity Commission
- World Bank
- And many more!

What can users do with the data?

Data Planet serves everyone's research and analysis needs with a suite of tools and features:

- Quickly create custom data visualizations
- Compare data from multiple and diverse sources
- Drill down to granular levels of detail within datasets
- Export data into multiple formats, including Excel, Delimited Text, SAS, XML, PDF, and Shapefile
- Export citations to EndNote and Zotero
- Create DOI links to ensure continued access to the data selected
- Generate data visualization embeds and easily integrate into any web page

65+ billion data points

90+ source organizations

Premium Datasets

Data Planet also offers seven premium modules, which are available as the supplements to the Core collection:

- China Yearly Statistics (National/Subnational)
- Claritas Consumer Profiles
- Claritas Financial and Insurance CLOUT™
- Data Axle: Historical US Business (formerly Infogroup Business USA)
